

DISPATCH		CLASSIFICATION S E C R E T	DISPATCH SYMBOL AND NO. EASA-5184
TO INFO	Chief of Station, Vienna Chief, EE		HEADQUARTERS FILE NO. 6-124-27/2
FROM	Chief of Base, Salzburg		DATE 127 APR 1961
SUBJECT	GECROOND/OPERATIONAL Inventory of SOB Arms Caches		RE: "43-3" — (CHECK "X" ONE) <input checked="" type="checkbox"/> MARKED FOR INDEXING <input checked="" type="checkbox"/> NO INDEXING REQUIRED
ACTION REQUIRED	See paragraph 2. below.		INDEXING CAN BE JUDGED BY QUALIFIED HQ. DESK ONLY
REFERENCE(S)	EGMA-30300, 5 December 1957 6-6-58		

1. Attached is a revised inventory of SOB arms caches (geographic coordinates are being forwarded under separate cover). For ease of reference, caches are numbered according to the original system assigned when each particular series was buried. The list has been expanded over the previous list (reference) to indicate more than one site at a given cache location when the cache has been subdivided, e. g., the Strasswalchen Caches (12/54 A and 12/54 B) consist of two five-man caches, each in a separate hole.

2. Caches which have been pulled by staff personnel or discovered by Austrians have been entered on the list and accordingly marked. (three 1951 caches, one 1952 cache and one 1954 cache) Our records indicate that two further 1952 caches may have been recovered (2 A and 14 A). We would appreciate any information Headquarters may have on their status. Number 14 A is in a border area heavily patrolled by customs officials and would be difficult to investigate first hand.

3. All caches except one were buried by staff personnel usually with the help of specially detailed U. S. soldiers. Agent help was used to replace the seven-ten Hochschwab Cache. Caches buried in 1954 were designed for either five or ten men (indicated on list). The 1952 caches, from a review of inventory, seem to be intended for ten men and the 1951 caches for twenty-five men. The Hochschwab and Sengsenggebirge caches were intended for upwards of 100 men.

4. SOB cache and DD folders have been reduced to about one-tenth their former bulk by removing photographs from heavy mounting paper, trimming excess margins from maps and sketches, placing in smaller envelopes and destroying excess photographs and descriptions (English language descriptions were considered excess when a German copy also existed). Folders for caches which have been retrieved have been destroyed with only written descriptions being retained for reference. Headquarters files presumably contain complete sketches, maps, etc., of these retrieved caches if there should ever be a need for operational review.
